Upcoming software engineer graduate with a diverse background in software design, OOP, Web technologies open source / Asp.net, and computer science theory.

Intangibles such as leadership, commitment, quick learner, and ownership that was fostered during 2 combat tours & time in Marine Corps.

An ability to absorb large amounts of technical information, understand it, and relay back in spoken or written form developed during my time as a writer.

PROFESSIONAL EXPERIENCE

Technical Writer intern

Pinsight media, Kansas City, MO - 06/2016 to 12/2016

- Develop written reports on large scale transfer of location/behavior data between internal/external companies
- Communicate standards for infrastructure, software requirements, and data origination points
- Review software architecture designs for ETL requirements
- Create Diagrams for networking upgrades & business tier software applications

Heavy Equipment Operator (Corporal)

United States Marine Corps 2010 - 2014

- Used HE to support the Air wing and mission critical military operations
- Oversaw the project management and construction of roads, helicopter pads, and runways
- Managed the maintenance cycles of \$3 million dollars' worth of heavy equipment
- Mentored and taught junior members on HE techniques and proper construction of various projects and implementations.
